DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3-5, 12, 72-74 and 76 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by Diefendorf which shows two clamping "tongs" (3-6 and 14-20) with a pinion on the second "tong" (3-6) that engages teeth (14) on the first "tong" (14-20) and each of the "tongs" is open at both the upper and lower edges to allow for insertion of the pipe.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 8, 19-21 and 69 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Diefendorf in view of any of Smith or Jurgens.

Diefendorf shows the claimed invention except for the use of a motor to drive the gear pinion (claims 8 and 19-21) and an oil rig mounting structure (claim 69). Either Smith or Jurgens suggests that a pipe section securing device can have one tong that is gear driven by means of a motor instead of by hand and the each can be

Application/Control Number: 10/074,947

Art Unit: 3723

secured in some known manner to an oil rig. It would therefore be obvious to one skilled in the art at the time the invention was made to modify Diefendorf by using a motor to drive the pinion gear and to mount the tool to an oil rig in some known manner <u>because</u> any of Smith or Jurgens suggests the use of such a motor in the same type of device, instead of a manual drive, and the mounting of the device onto an oil rig, in some known manner.

Allowable Subject Matter

- 5. Claims 2, 9-11, 13-18, 65, 75 and 77 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Claims 56-64, 66-68, 70 and 71 are allowed.

Response to Arguments

7. Applicant's arguments filed 22 March 2005 have been fully considered but they are not persuasive.

Applicants argument that Diefendorf does not have an edge at the opening is in error as a box wrench or a socket all have an other edge at the opening and clearly Diefendorf has movable clamping elements that make up the gripping assembly, thus new claims 72-74 and 76 are not patentable.

Further, merely providing a motor to operate the gearing is an obvious modification as such motors in gear wrenches are well known.

Application/Control Number: 10/074,947

Art Unit: 3723

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 571-272-4496. The examiner can normally be reached on M-Th (7:05- 4:35) Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail, III can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
